Smart Control

Precise coordination of 3 motors

The Full-inverter control system well coordinates the running power of 3 DC motors between 20%~100% (averagely 50%), making them perfectly match each other to realize longer endurance.

Smart sensors

The robot features sensors designed to prevent detachment from the pool floor.

Adjustable suction & running power

In different conditions, the Full-inverter control system will intelligently adjust the most suitable motor running speed to bring the best flow and cleaning effect with the lowest energy consumption.

Model	M45RR	M30RR
Performance conditions reference* : Floor mode in liner pool		
Performance time	4.4h	2.8h
