### FORM Smart Swim Goggles

Display real-time metrics in the lens during your swim while syncing to the app to track and measure progress toward your goals.

### Aquatic WaveBreaker™ Design

### Clean\* water with less effort

Our exclusive ClearRay Active Oxygen® System uses air and light to produce clean\* water, which means fewer chemicals. This advanced oxygen process is available on all our models to keep water clean\* longer. With Active Oxygen®, it cleans\* more so you clean less.

### 4-Stage\*\* Filtration Process

#### Stages 1 and 2

The skimmer and unique mesh ProCatch® bag work together to clean the water surface and trap large debris for easy removal.

#### Stages 3 and 4

This exclusive system features 2 60 sq ft ProClear® filters connected directly to a ProStream® pump that filters an incredible 35 gallons per minute, giving you clean water faster.

ClearRay Active Oxygen® System is standard on all Jacuzzi® PowerPro® and PowerActive® models.

\*Clean is defined as the removal of microscopic (down to 3-micron level, varies by hot tub or swim spa model) debris from the water.

The ClearRay Active Oxygen® System utilizes various technologies to achieve cleanliness. One of them is ozone, which aids in the grouping of smaller debris to form larger clusters that can be more easily captured in the filtration process.

\*\*Stages of filtration may vary by collection.
